Why Leave It To Chance?

You know something of the way in which things left to chance usually work out. You know and appreciate the risk, the danger of leaving the question of accumulating for future use to chance or convenience. You also realize, the decision being made, the result of putting off action from time to time.

Three things are necessary to make certain the success of the coal business, viz:

THE BEST GOODS
LOW PRICES
A CONSTANT MARKET

That we can compete with the lowest price of any competitor and still make a profit, is proven by the following facts:

Our coal is in a most advantageous position; our entire tract is on railroad, good coal, easily mined, new machinery, new mine, and experienced management.

All preparation have been made to have the mine in operation by early summer.

The average cost of placing coal on car, ready for shipment, for three months, 94 cents per ton. Add to this our royalty of three cents per ton, which gives an actual cost of 97 cents per net ton.

Rate From Interstate Mining Company
To Canton 40c per ton
To Akron 60c per ton
To Cleveland 70c per ton
To Medina 70c per ton

The Pittsburg Rates

To Canton 95c per ton
To Akron 95c per ton
To Cleveland \$1.00 per ton
To Medina \$1.00 per ton

WE QUOTE YOU PRICES OFFERED US BY LARGE CONSUMERS OF COAL FOR 1917 AND 1918, f. o. b. MINES.

(On Contract)

MINE RUN \$2.50
SLACK \$2.50
¾ IN. LUMP \$2.75
1½ IN. LUMP \$3.00
6 IN. LUMP \$3.25

Based on these prices we will be able to make a very good profit on our first year's business, insuring the investor a quick return on the money invested.

Mr. Ira Williams and Mr. George Andrews of this company are now at the Union hotel, where they will be pleased to meet any and all who wish to investigate our proposition.
